

DANIEL SANTOYO PANCHE

Full-Stack Developer (React · Next.js · React Native) | Architect & BIM background

Bogotá, Colombia (Remote) • +57 321 452 7399 • dsantoyop@gmail.com
linkedin.com/in/danielsantoyodev • github.com/daftboston • truephone.shop

SUMMARY

Product builder who designs and ships web and mobile products end to end, from data model, auth, and payments to UI and CI. Founder-developer of TruePhone, a Next.js + Supabase marketplace for used iPhones in Colombia with Wompi payments and real-time messaging; currently building an Expo / React Native iOS app. Architect with ~7 years in BIM/Revit, bringing a structured-data, process, and automation mindset. Seeking full-stack or frontend roles (React, Next.js, React Native).

PROJECTS

TruePhone: Used-iPhone Marketplace (truephone.shop) | Founder & Developer

Jul 2026 – Present

Next.js 16 (App Router, Server Actions) · React 19 · TypeScript · Tailwind CSS 4 · shadcn/ui · Prisma 7 · Supabase (Postgres, Auth, Storage, Realtime) · Zod · Wompi · Resend · Vercel · GitHub Actions

- Designed and built a two-sided marketplace for used iPhones in Colombia: listings with photo galleries, model search and comparison, buyer–seller chat, orders, reviews, and seller profiles.
- Modeled the domain in Prisma on Supabase Postgres (39 models, 24 migrations); implemented Supabase Auth (email + Google OAuth), Storage buckets with row-level security, and live chat with Supabase Realtime.
- Integrated Wompi checkout and webhooks behind a pluggable payments layer, plus a ledger-based financial core for fees, holds, settlement, and seller payouts; email via Resend, scheduled jobs via Vercel Cron.
- Built an ops back office for listing moderation, ID + selfie verification, disputes, payouts, support cases, and analytics.
- GitHub Actions CI (format, lint, typecheck, 48 unit-test files, build against Postgres 16), Husky + lint-staged; documented PRD, architecture, and design system; AI-assisted workflow (Cursor).

Atlas: Language-Learning iOS App | Developer (early stage)

Sep 2026 – Present

Expo SDK 57 · React Native 0.86 · Expo Router (typed routes) · TypeScript · EAS Build · Jest + React Native Testing Library · ESLint

- Building a speaking-first language-learning app for iOS with Expo / React Native development builds.
- Set up the foundation: Expo Router file-based navigation, bundle identifiers, EAS build profiles (development, preview, production), an iOS Simulator dev client, and quality tooling (ESLint, typecheck, Jest + Testing Library, expo-doctor).

Tesla Partes CO: Tesla Parts E-commerce | Founder & Developer (early stage)

Oct 2026 – Present

Next.js 16 (App Router) · React 19 · TypeScript · Tailwind CSS 4 · Prisma + PostgreSQL (Docker Compose) · Playwright · GitHub Actions

- Storefront for Tesla-compatible parts in Colombia: model-first navigation (Model 3 / Model Y → interior / exterior → year), fitment filtering, and COP pricing with IVA breakdown; Prisma/Postgres schema designed, catalog still on sample data.
- Set up CI (Prisma validate, lint, typecheck, build) and a PR workflow that posts Playwright desktop/mobile screenshots.

WhatsApp AI Chatbot for Housing Projects (prototype) | Developer

Aug 2025 – Nov 2025

Node.js · Express 5 · WhatsApp Business Cloud API (webhooks) · xAI Grok API via OpenAI SDK · Google Sheets API

- Webhook-based WhatsApp assistant that answers questions about housing projects from a structured JSON catalog and uses LLM function calling to book appointments into Google Sheets.

Architecture Portfolio (danielsantoyoarq.netlify.app) | Designer & Developer

Apr 2024 – Present

HTML · CSS · JavaScript (ES modules) · Bootstrap · Python build scripts · Netlify

- Static portfolio of architecture case studies; Python scripts generate ES/EN pages from one bilingual source and lazy-loaded WebP images; Netlify redirects by browser language.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, SQL (PostgreSQL), Python (scripting)

Frontend: React, Next.js (App Router, Server Actions), Tailwind CSS, shadcn/ui, Radix UI, React Hook Form, React Router, Vite

Mobile: React Native, Expo, Expo Router, EAS Build

Backend & Data: Node.js, Express, Prisma, PostgreSQL, Supabase (Auth, Storage, Realtime, RLS), MongoDB, JWT, Zod

Integrations: Wompi (payments + webhooks), Resend, WhatsApp Cloud API, OpenAI SDK / xAI, Google Sheets API

Tooling & DevOps: Git, GitHub Actions, Vercel, Netlify, Docker, ESLint, Prettier, Husky, Jest, Playwright, Cursor

PROFESSIONAL EXPERIENCE

Architect Designer | Marval Constructora

Dec 2024 – Present

- Built an AI bot to speed up searching for project information.
- Adopted BIM design protocols that cut design time by ~10% from concept to delivery.

Architect Designer | Construcciones Crear

Jul 2021 – Jun 2024

- Led BIM adoption in a traditionally non-BIM organization; authored BIM workflow protocols that standardized modeling and model quality (Revit, Navisworks).

Site Resident | Obracol S.A.S

Apr 2019 – Jul 2021

- Built BIM models of warehouses for quantity takeoffs; managed schedules, budgets, and purchasing for maintenance works.

EDUCATION

Architect, Universidad Nacional de Colombia (2019) • **BIM Coordinator Diploma**, NASKA (2022) • **BIM Diploma**, Pontificia Universidad Javeriana (2021)

Languages: Spanish (native); English (technical, B1–B2)
